-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE ____ MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3641

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 2-10, 21, drawn to a fuel assembly, classified in class 376, subclass 444.

II. Claims 12-20, 22, drawn to a screw, classified in class 411, subclass 81+.

The inventions are distinct, each from the other because:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because of the presence of claims such as claims 6 and 21 which are evidence claims showing that combination does not require the particulars of the subcombination as claimed for patentability. The subcombination has separate utility such as for fastening a door hinge to a door.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

2. Upon election of one of the inventions identified above as I and II, applicant is further required under 35 USC 121 to elect one of the following disclosed species for

Art Unit: 3641

prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable (currently, no claim is generic):

- A. The embodiment of Figs. 8 and 9 C.
 - B. The embodiment of Fig. 8 with the rotation prevention pin of Fig. 9A.
 - C. The embodiment of Fig. 8 with the rotation prevention pin of Fig. 9B.
 - D. The embodiment of Fig. 10.
 - E. The embodiment of Fig. 11.
 - F. The embodiment of Fig. 11 with the rotation prevention pin of Fig. 9A.
 - G. The embodiment of Fig. 11 with the rotation prevention pin of Fig. 9B.
3. Applicant is advised that a response to this requirement must include an identification of each species that is elected consonant with this requirement, and listing of all claims readable thereon, including any claims subsequently added. An argument that a generic claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103 of the other invention.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Harvey Behrend whose telephone number is (703) 305-1831. The examiner can normally be reached on Tuesday to Friday.

Art Unit: 3641

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor Michael Carone, can be reached on (703) 306-4198. The fax phone number for the organization where this application or processing is assigned is (703) 306-4195.
